

Art Contest Winners

The Johnston County Mental Health Center in partnership with local health and mental health providers sponsored a community awareness family fun day event in observance of Children's Mental Health Week on May 8th to promote wellness, increase awareness about children's health and mental health issue and to provide exposure to community resources. This event was held at the Johnston Medical Mall on North Bright leaf Blvd. There were over 30 vendors who provided information to the families that attended the event. Along with information, there were free games and activities, prizes, and food for the entire family. Students were encouraged to participate in an art contest by submitting art work, writings or videos that reflected the events theme, Healthy Minds, Healthy Lives. 48 students across the county participated and 12 students were selected as 1st, 2nd or 3rd place winners in each category.
